analyzer: catálogo de información.
car: característica a consultar.
min_value: valor mínimo en el rango que se quiere de la característica.
max_value:valor mínimo en el rango que se quiere de la característica.

Para hacer esta tarea se invoca la función de artistas_unicos() donde a esta se le da una lista con los mapas de los tracks y se retorna una lista con los artistas unicos y sin repeticiones por medio de un recorrido y un lt.isPresent()
